

Sustainable and Resilient Remediation

Resource

An introduction to GSR including sustainability metrics, environmental footprint assessment methodology, incorporating GSR into the environmental restoration process, and footprint reduction methods. It appears there is no requirement for project sites to use green remediation practices.

Climate

Resource

Alaska state climate change webpage, found on the Department of Commerce, Community, and Economic Development page. Their mission is to “Promote strong communities and healthy economies.” Contains links to climate change science.

<https://www.commerce.alaska.gov/web/dcra/climatechange.aspx>

Alaska state page that provides data on tundra conditions.
