Created a Governor's Committee on Climate and Resiliency to oversee the development of an implementation plan that maintains and builds upon Delaware's leadership in responsibly reducing greenhouse gas emissions. The Executive Order requires the committee to develop agency-specific actionable recommendations for improving the state's preparedness and resiliency to climate impacts on public health and safety, public infrastructure and facilities, water resources, natural ecosystems, agriculture, tourism, and other industries. The recommendations shall prioritize the use of natural systems or green infrastructure as the preferred means to improve resiliency.
