# Climate

## Website

Statewide campaign supported by the Georgia Emergency Management Agency/Homeland Security (GEMA/HS) aimed at motivating Georgians to take action to prepare for a disaster. Ready Georgia provides further guidance on the three most important steps you can take to protect you and those in your care: Make a Plan, Build a Kit, Get Ready Kids, Ready Your Business.

https://gema.georgia.gov/plan-prepare/ready-georgia

The GCMP (Georgia Coastal Management Program) has established the Coastal Hazards Specialty Area of study including Climate Change/Sea-Level Rise in Coastal Georgia, which will address the need for more data, information and planning.

https://coastalgadnr.org/CoastalHazards

The GCMP (Georgia Coastal Management Program) completed a document to guide the coast in community redevelopment after a major natural disaster (e.g. building setbacks, building repair restrictions, shoreline hardening or retreat, and redevelopment of publicly funded infrastructure). The guide also evaluates the need for new or revised state policies on the post-disaster repair and rebuilding of permitted piers, docks, and marinas.

# Wildfire

## Website

Website contains links to all CWPPs in Georgia. GFC (Georgia Forestry Commission) helps communities prepare for wildfire potential by creating a Community Wildfire Protection Plan (CWPP). We work with officials and citizens to identify risks that might slow an emergency response if there is a danger from wildfires.

https://gatrees.org/fire-prevention-suppression/community-wildfire-protection-plan/

Website contains information and links related to fire weather, wildfire prevention, pre-suppression firebreaks, Community Wildfire Protection Plan (see above), Emergency Response, Incident Command System, and Georgia Wildfire Public Viewer.

https://gatrees.org/fire-prevention-suppression/wildfire-prevention/

Website contains a list of things to do before a wildfire and includes links to communication plans, make a ready kit, evacuation plans, and more.

https://gema.georgia.gov/wildfires

Website contains information on why and how people should limit their exposure to wildfire smoke. It also contains links to current conditions, interactive maps, alerts, and advisories.

https://dph.georgia.gov/wildfire-smoke

Website contains links to real-time sources including lightning data, fire danger ratings, and air quality monitoring as well as links to sources for historic data and forecasting.
