### Report

USEPA state fact sheet from their "What Climate Change Means for..." series for Nevada

<https://19january2017snapshot.epa.gov/sites/production/files/2016-09/documents/climate-change-nv.pdf>

### Website

State of Nevada Climate Strategy and Climate Initiatives.

<https://climateaction.nv.gov/>

The State of Nevada climate change page (edited for formatting): "Once thought of as a future problem, there is a growing body of evidence linking climate change with changes in fish and wildlife and their habitats. Nevada is experiencing the effects of climate change in a number of ways; some of which are more difficult to measure than others. Climate change predictions for Nevada include: Increased temperatures, Warmer winter storms, Earlier spring snowmelt, Lower spring-summer streamflows, Increased storm severity, Increase in severity and frequency of wildfires, Increase in invasive species"

<https://heritage.nv.gov/programs/climate-change-program>

## Wildfire

### Report

Documents the commitment of agencies to improve efficiency by facilitating the coordination and exchange of personnel, equipment, supplies, services, and funds related to projects that involve activities such as fire suppression and preparedness, fuels management, and wildfire training and prevention.
