

## Sustainable and Resilient Remediation

### Website

This rule is intended to protect public health and the environment by establishing procedures and requirements for conducting investigations and corrective actions at properties where a release of hazardous materials has occurred. This includes procedures for identifying hazardous material contamination to environmental media including soil, groundwater, surface water, and air, as well as requirements for source treatment, removal, or containment, long term monitoring and institutional controls.

Vermont's State Hazard Mitigation Plan: "The 2018 Vermont State Hazard Mitigation Plan (SHMP) presents the hazard impacts most likely to affect

Vermont and a mitigation strategy to reduce or eliminate our most significant vulnerabilities. This SHMP is a complete rewrite of the 2013 Plan, both in the content of the Plan document and its mitigation actions.
